Information Concerning Investment Risk

Certificateholders and prospective purchasers of Certificates should ensure that they understand the nature of the Certificates and the extent of their exposure to risk and that they consider the suitability of the Certificates as an investment in the light of their own circumstances and financial condition. The amount payable on redemption of the Certificates is linked to the performance of the Underlying Indices (as defined herein).

Potential investors are urged to consult with their legal, regulatory, investment, accounting, tax and other advisors with regard to any proposed or actual investment in these Certificates.

Please see the Base Prospectus for a full detailed description of the Certificates and in particular, please review the Risk Factors associated with these Certificates. Investing in the Certificates entails certain risks including, but not limited to, the following:

Adjustments: The terms and conditions of the Certificates will allow the Determination Agent to make adjustments or take any other appropriate action if circumstances occur where the Certificates or any exchanges are affected by market disruption, corporate events or circumstances affecting normal activities.

Adjustment and Discontinuation Risk: The Sponsors of the Underlying Indices can add, delete or substitute stocks constituting the Indices or make other methodological changes that could change the value of the Underlying Indices without regard to the interests of holders of the Certificates. Any of these decisions/determinations may adversely affect the value of the Certificates and may result in the investor receiving a return that is materially different from what he/she would have received if the event had not occurred.

Credit Risk: The holder of the Certificates will be exposed to the credit risk of the Issuer.

Exit Risk: The principal amount is protected only at maturity. Investors who decide to exit their investment before the maturity date run the risk that they may not receive their initially invested amount. The secondary market price of the Certificates will depend on many factors, including the value and volatility of the Underlying Indices, the level of the Underlying Indices at any time on any day and the time left until the maturity of the Certificates, interest rates, the dividend rate on the stock that compose the Underlying Indices, time remaining to maturity and the creditworthiness of the Issuer. As a result of all of these factors, the holder may receive an amount in the secondary market which may be less than the then intrinsic market value of the Certificates and which may also be less than the amount the holder would have received had the holder held the Certificates through to maturity.

Hedging Risk: On or prior to and after the Trade Date, the Issuer, through its affiliates or others, will likely hedge its anticipated exposure under the Certificates by taking positions, in option contracts on the Underlying Indices or positions in any other available securities or instruments.

Liquidity Risk: The Certificates will not be traded on an organized exchange. Any secondary market in the Certificates made by the Dealer will be made on a reasonable efforts basis only and subject to market conditions, law, regulation and internal policy. Even whilst there may be a secondary market in the Certificates it may not be liquid enough to facilitate a sale by the holder.

Potential Conflict of Interest: The Determination Agent (MSI plc) is an affiliate of the Issuer and the economic interests of the Determination Agent may be adverse to the interests of holders of the Certificates. Determinations made by the Determination Agent may affect the amount payable to holders pursuant to the terms of the Certificates.

Underlying Sponsor Risk: The Sponsors of the Underlying Indices is not an affiliate of the Issuer or its affiliates and is not involved with this offering in any way. Consequently, the Issuer and the Determination Agent have no ability to control the actions of the sponsor of the Underlying Indices, including any rebalancing that could trigger an adjustment to the terms of the Certificates by the Determination Agent.
